

The Radiarc Sprayer

The RADIARC® Sprayer is a precision, boomless application device which applies pesticides and plant growth regulators in a uniform pattern while providing excellent drift control with accurate - low volume application.

Depending on the choice of nozzle orifice, swath width, spray pressure, speed and position the RADIARC® Sprayer can apply volumes of 5 to 125g/acre on swath widths of 5 to 40ft, with accuracy and uniform spray deposition across the swath.

The RADIARC® sprayer can be mounted on the side of a spray vehicle to apply weed or brush control products to roadsides, ditchbanks, or railroad right of ways. If mounted on the rear of it can apply a full width swath to forest plantations, rangelands or utility rights of way.

MODEL S-A3	Standard RADIARC® consists of Stainless Steel Spray Head with Pressure Gauge; one set (25 pieces) of Nozzles (choice of .030, .045, .070, .085 or .101), one set (15 pieces) of Nozzle Plugs; Modular Power Control Box with 20 foot Connector Cable and 10 foot Power Cable; Manual control valve.	\$5,025.00
MODEL S-A3-V	Standard RADIARC® Sprayer Plus Electric Solenoid Control Valve	\$5,230.00
MODEL S-A3-SM	Standard RADIARC® Sprayer Plus Stainless Steel Swivel Mount	\$5,145.00
MODEL S-A3-SMV	Standard RADIARC® Sprayer Plus Stainless Steel Swivel Mount and Electric Solenoid Control Valve	\$5,330.00
MODEL S-A3-VA	Standard RADIARC® Sprayer Plus Stainless Steel Vertical Actuator Assembly (changes vertical angle of RADIARC® Spray head using power control box switch) and Electric Solenoid Control Valve	\$5,990
