

CONTROLLING VEGETATION ON INDUSTRIAL SITES IS A TOUGH JOB.

# ARSENAL<sup>®</sup> IS TOUGH TREATMENT.

**Tough on weeds. Easy on the environment.**

Unwanted vegetation can be dangerous and costly. Weeds can compromise worker safety and your relationship with adjacent landowners.

In one low rate application, ARSENAL herbicide provides effective control of broadleaf weeds and grasses, keeping ground weed-free all season long. ARSENAL also reduces costly re-treats, avoiding additional labour costs and minimizing workplace disruption.

ARSENAL stays where it's sprayed. When used as directed, ARSENAL presents minimal risks to birds, fish, animals or insects.
