

# 3 steps to keep spray On Target

1. Common sense and good judgment
2. Proper well calibrated equipment
3. Use **ON TARGET** drift management adjuvant

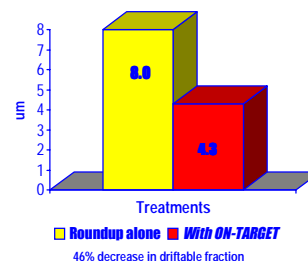

## Manage drift with On Target

- ✓ Reduces fine spray droplets
- ✓ Produces uniform spray pattern
- ✓ Maximizes spray efficiencies
- ✓ Easy to use and low rates
- ✓ Low cost per acre
- ✓ Reduces potential for environmental concerns

**VMD\* Comparison** ( $\mu\text{m}$ )  
\*Volume Median Diameter

**Driftable fraction**  
(% volume <100  $\mu\text{m}$ )
