GENERAL INFORMATION

EcoClear is a post-emergent, foliar active, vegetation management product formulated to contain organic acids that are components of vinegar and lemon juice. It is non-selective to green foliage and non-residual in soil.

EcoClear is recommended for the control of herbaceous broadleaf and grassy weeds on non-crop land areas, such as: sidewalks, driveways and patios; railroad rights-of-way, power stations, and industrial sites; around farm buildings, storage areas, tank farms, greenhouses, plant nurseries and golf courses; and in fence rows and vacant lots.

EcoClear is fast acting. Foliar contact results in rapid breakdown of annual weeds and suppression (top growth reduction) of herbaceous perennial weeds. Retreatment is required for complete control of established perennial weeds.

ANNUAL WEEDS CONTROLLED

Ragweed spp.
Chickweed
Lamb's-quarters
Black Medic

SUPPRESSION OF PERENNIAL WEEDS

Dandelion
Plantain spp.
Clover spp.
Wild Carrot
Toadflax
Quack Grass
Tuffed Vetch
Hawkweed spp.
Curled Dock

CAUTION: Avoid contact on desirable plants. Overspray or drift will injure contacted vegetation.

This product may be toxic to aquatic organisms. Do not apply or allow runoff to reach lakes, streams and ponds. Do not contaminate water by cleaning of equipment or disposal of wastes. A buffer zone of at least 15 meters should be established between areas to be sprayed and aquatic environments.

Avoid application to reactive metals such as aluminum, tin, iron, or items such as fencing or lawn furniture in order to prevent staining, mottling, or otherwise interfering with finished metal surfaces.

Do not apply this product through any type of irrigation system.

Do not apply by air.

DIRECTIONS FOR USE

Best results are achieved from spring and early summer applications to actively growing young weeds. Degree of control depends on several factors, including size and stage of application. Small annual weeds may be completely controlled with a single application. Control of larger, more established weeds, not completely desiccated with one application may be short-term and require retreatment. Weeds that are mature, dormant or hardened due to moisture stress tend to be more tolerant to herbicide treatment. Complete coverage of undesirable vegetation is necessary to achieve control. Only contacted vegetation will be affected. Seeding perennial weeds may be controlled with a single application; however, repeat application is required for control of regrowth of established perennial weeds. Rainfall within 1 hour of application will reduce degree of control.

FOR EARLY SEASON ANNUAL WEED CONTROL, when weeds are small (3 to 5 leaf) and actively growing; mix a spray solution consisting of 1L of product for each 3L of water. Ensure adequate mixing. Spray unwanted vegetation to point of wetness. SPOT TREATMENT APPLICATION: Use a single nozzle or hand-gun applicator to direct the spray and thoroughly wet undesirable foliage.

BROADCAST APPLICATION: For broadcast application use a solution volume of 750 to 1000L per hectare. Thorough coverage is necessary to achieve desirable control. For dense populations and heavy foliage use the higher spray volume to ensure adequate coverage. Apply with flat fan nozzles and sufficient pressure to achieve required coverage.

FOR CONTROL OF LARGER ANNUAL WEEDS AND TOP GROWTH REDUCTION (SUPPRESSION) OF PERENNIAL WEED GROWTH. Mix a spray solution consisting of 1L of product for each 2.25L of water. Use an application system, solution volume and adequate spray pressure to ensure complete coverage of unwanted vegetation. Best results with larger weeds will be achieved by spot treatment. For broadcast application use a solution volume of 750 to 1250 L/ha. Retreatment is required for regrowth of perennial weeds.

PRECAUTIONS: Avoid contact with skin, eyes and clothing. Wash immediately after use. Overspray or drift will injure contacted foliage. Avoid all contact to desirable plants. WEAR SAFETY GOGGLES OR FACE SHIELD AND GLOVES during mixing / loading and application with hand held equipment.

FIRST AID: In case of eye contact flush with plenty of clean water for 15 minutes. Contact a physician or poison control centre. If on skin wash affected areas thoroughly with water. In the event of ingestion, administer 3-4 glasses of milk or water. Do not induce vomiting. Seek medical attention or contact a poison control centre.

STORAGE

Do not contaminate water, food or feed by storage or disposal. Keep from freezing. Store only in original tightly sealed container and out of reach of children. Store product with other herbicides, in a cool, dry, well ventilated place away from seed, feed, fertilizer or other pesticides.

DISPOSAL

1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills contact the provincial regulatory agency or the manufacturer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
