DANGER: May cause eye or skin damage

First Aid:

- If in Eyes:** Flush with water for 15 minutes, then get medical attention if necessary.
If on Skin: Wash with plenty of water, get medical attention if irritation persists.
If Swallowed: Call a physician immediately. Drink two (2) glasses of water. Induce vomiting.
If Inhaled: Remove to fresh air; apply artificial respiration if necessary.

General Information: Eliminate™ is formulated to remove pesticide deposits and residues, from tanks (inside & out), hoses, booms, filters, screens and nozzles. Eliminate™ was developed to handle difficult to clean chemicals. Eliminate™ will neutralize phenoxy herbicides and solubilize sulphonylureas.

Directions for use: Eliminate™ may be used as a general purpose cleaner and spray equipment decontaminator by varying the rate of Eliminate™. Immediately after spraying, drain tank, hoses and boom completely. Remove nozzles and screens from boom. Half-fill tank with clean water and add Eliminate™ at the selected rate. Agitate and flush the hoses and boom with the cleaning solution. Add sufficient water plus selected rate of Eliminate™ to provide adequate agitation and movement in the tank. Spray Eliminate™ mixture on all interior surfaces. Rinse the tank with clean water and flush through the hoses and boom. Spray rinsate on site approved for the pesticide being removed from the spray tank or by other procedures approved by appropriate authorities. Sample of final rinse may be applied to a susceptible plant to ensure total decontamination.

Use Rates:
