

CONCENTRATED INDICATOR™ BLUE

CONCENTRATED Spray Pattern Marker

For Vegetative Management, Forestry, Industrial, Rail, Utility, and Rights-Of-Way Uses.

NET CONTENTS: 1.0 or 4.0 L

ACTIVE INGREDIENTS: Dye & inert Ingredients.....100%

GENERAL INFORMATION

CONCENTRATED INDICATOR BLUE is an industrial strength, concentrated liquid spray marker. It is a temporary blue spray indicator that can be added to pesticides and other liquid spray solutions. CONCENTRATED INDICATOR BLUE helps the applicator know where they have sprayed by showing a highly visible but temporary blue marking. Prevents costly overlaps and skips, indicates drift and improper application and improper spray patterns.

CAUTION: KEEP OUT OF REACH OF CHILDREN

Avoid contact with skin, eyes and clothing. Do not take internally.

PRECAUTIONARY STATEMENT

Do not contaminate water sources by runoff from cleaning of equipment, disposal of equipment wash-waters, or spray waste. Wear eye protection and rubber gloves when handling or using CONCENTRATED INDICATOR BLUE.

STORAGE AND DISPOSAL

Store in original container only. Keep container tightly closed. Store above 0 °C to prevent freezing. Do not contaminate food or feed by leak, spill or disposal of product. Do not store with oxidizing agents or ammonium nitrate. Triple rinse and offer for recycling or disposal in accordance with local, provincial and federal regulations.

APPLICATION RATES

Shake well before using. Apply 175mL – 945mL of CONCENTRATED INDICATOR BLUE per 378L of spray mixture. For gravel and bare ground use 175-355mL/378L; for vegetation, rights of ways use 295 – 475mL/378L; for forestry, brush and railways use 355 – 945mL/378L. Add CONCENTRATED INDICATOR BLUE to the spray tank when it is half full. The rate can be adjusted up or down. Higher rates will increase the darkness of the spray pattern. Colouration may vary with turf colour and height, spray rates, and water conditions.

For optimal rates of CONCENTRATED INDICATOR BLUE, test with the spray solution and rate of CONCENTRATED INDICATOR BLUE before use and adjust as needed. Find a rate that is functional and economical. CONCENTRATED INDICATOR BLUE can be used with any type of sprayer including backpack, wand, or any other type of sprayer.

FIRST AID

Inhalation: Move victim to fresh air. Give artificial respiration ONLY if breathing has stopped. Give cardiopulmonary resuscitation (CPR) if there is no breathing AND no pulse. Obtain medical advice **IMMEDIATELY**.

Skin contact: Flush skin with running water for a minimum of 20 minutes. Start flushing while removing contaminated clothing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.

Eye contact: Immediately flush eyes with running water for a minimum of 20 minutes. Hold eyelids open during flushing. If irritation persists, repeat flushing. Obtain medical attention **IMMEDIATELY**.

Ingestion: If victim is alert and not convulsing, rinse mouth out and give 200-300 mL (1 cup) of water to dilute material. If spontaneous vomiting occurs, have victim lean forward with head down to avoid breathing in of vomitus, rinse mouth and administer more water. Obtain medical attention **IMMEDIATELY**.
