Net Contents: 10 L

STAYPUT VM is a deposition utility modifier that improves the deposition of pesticides onto plant and soil surfaces.

STAYPUT VM should be used in accordance with good agronomic practices, which include using calibrated spray equipment set for proper coverage. Applications must be made during the day at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.

DIRECTIONS FOR USE

STAYPUT VM is compatible with products registered for Industrial Vegetation Management, Forestry, Range and Pasture, other Non-Cropland uses and Turf. **STAYPUT VM** is *not* to be used for Conifer Release in Forestry. **STAYPUT VM** may be applied by ground or aerial spray equipment in low or high volume sprays.

Ground Application Method	Rate (mL/ha)*	Recommended Water Volume (L) **
Bare Ground	1130	400
Foliar (high volume)	565-1130 or 0.125% v/v	1120
Foliar (low volume concentrate – Back Pack)	70-140	60
Dormant Stem	1250	1120
Turf	565-1250 (5.65-12.5 mL/100m ²)	400-1600

*Use higher rates as season and plant growth progresses.

**Use enough water to obtain adequate spray coverage.

STAYPUT VM can be applied by air using 280-420 mL/ha in 110 - 280 L of water or 565-1130 mL/ha in water volumes above 280 L.

MIXING: Fill spray tank one-half full with water and begin agitation. Add **pesticides** as directed by label and continue filling. Add **STAYPUT VM** last and continue agitation.

ENVIRONMENTAL RESTRICTIONS: This product is not for aquatic use. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwaters.

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

For more information on specific applications please contact your Engage Agro Representative.
