

# Hi-Light<sup>®</sup> Tablets

## Blue Spray Indicator

- \* Water Soluble Tablets
- \* See where you spray
- \* Dissipates under sunlight or moisture
- \* Indicates skips and overlaps

Hi-Light<sup>®</sup> is a temporary colorant used for effectively marking spray applications. Hi-Light Tablets are made from food grade material and specifically designed for use when making herbicide and fertilizer applications with 1-5 gallon sprayers. Only one Hi-Light tablet for each 1-2 gallons of liquid provides the visibility needed for more accurate and uniform applications of pesticides and liquid fertilizers. And the color breaks down with sunlight and moisture in only 1-2 days.

### Other Uses for Hi-Light indicator tablets:

Fountain colorant – Use in coloring water in fountains and small ornamental ponds. Color will generally last 3-4 weeks with no outflow.

Foam Dye Colorant – Use in coloring agricultural foam marker solutions. Turns foam concentrate blue, increasing visibility.

### Suggested Use Rates

Use	Suggested Rate*
Spray Pattern Indicator In Small Sprayers	1 Tablet Per 1-2 gallon (3.8-7.6 L) of spray solution
Fountain Colorant	1 Tablet Per 250 gallons (950 L) of water
Foam Dye Colorant	1 Tablet per 5 gallons (19 L) of foam/water solution

\* Rate in any application may be adjusted to increase or decrease color intensity.

**CAUTION: KEEP OUT OF REACH OF CHILDREN.** Do not take internally. In case of eye contact, flush with large amounts of water and consult a physician. In case of ingestion, dilute with water and consult a physician. Rinse contents into the spray tank and crush container prior to disposal.
