

Wavex Lake and Pond Colorant

WAVEX is a high quality, concentrated water colorant. It creates a beautiful natural appearance to lakes, ponds and larger aquariums. WAVEX is safe to fish and aquatic species, waterfowl, wildlife and pets. It is noncorrosive and when used according to recommended rates, will not stain stone, fountains, approved aquatic features or swimwear.

Apply 1 L of WAVEX per 250,000 gal. A 4 L container will treat 1,000,000 gallons of Water volume can be determined using the following formula: pond length in feet x pond width in feet x average depth in feet x 6.2495 = total gal .

RECOMMENDED RATES FOR SMALL WATER BODIES
ADD ONE DROP FOR EACH GALLON OF WATER OR TILL
COLOR MEETS SATISFACTION.

The original colour level should be effective for 3-4 weeks, depending on environmental factors such as sunlight. Chlorinated systems typically require additional quantities within 2 weeks since chlorine will oxidize and degrade this product.

Do not use with filtration media that removes color.

To return the colour to its intended coloration level, simply add small amounts of WAVEX from time to time. This will offset the chlorination or natural bleaching that occurs in coloured bodies of water.

Features & Benefits of wavex

- 1 Easy to use . does not need to be prediluted and no special equipment required**
- 2 Concentrated . disperses readily by currents and natural movement of water**
